

March 19 Build a Webpage in a Day with Black Girls CODE!

- Who:** Girls, ages 7-17
Where: Jose de Diego Middle School, 3100 NW 5th Avenue, Miami, FL 33127
When: Saturday, March 26, 2016 10am – 4pm
Why: Girls Learn to Build a Webpage in a One-Day Workshop
Cost: \$35 (25% discount for Jose de Diego Students)
Deadline: Register by March 19 at <http://bit.ly/1TsrhbL>

Black Girls CODE will be hosting a workshop where girls learn to build their own unique webpages using HTML, CSS and basic web structures. The girls will play games and complete fun activities while building their webpages. All BGC workshops are geared towards introducing participants to the technological universe and encouraging them to pursue careers as tech creators and entrepreneurs.

This event is intended for all girls ages 7-17.

The following questions will be answered at the March 19 Build a Webpage in a Day Workshop:

- How are web pages designed and coded?
- How can I build my own webpage, at the workshop, and at home?
- How do some of your favorite webpages work?

Check-in will begin at 9:00 AM and the workshop will start promptly at 10:00 AM. Registration for this workshop is \$35. Limited scholarships are available. Participants *do not* need to bring their own computers. Access will be provided to a computer workstation during the workshop. Lunch and snacks will also be provided. ***Space is limited. So sign up soon to secure your spot!***

The young women who participate will be building valuable skills in ideation, computation science, teamwork, and public speaking. Black Girls CODE events are open to girls of all experience levels who are interested in computer science, STEM, mobile apps, design and gaming.

About Black Girls CODE

Since 2011, Black Girls CODE has been a transformative global movement fueled by the power of individual, but connected and engaged chapters, dedicated to providing girls of color with the technical skills and inspiration to become technology leaders of tomorrow. Black Girls CODE is committed to changing the face of technology. In 2012 - its first full year of programming - BGC engaged, educated and empowered 800 girls in 16 cities across the globe. We have now reached over 4000 girls and built a network of over 2000 volunteers all over the country and world. We have 6 chapters in the United States - Atlanta, Washington DC, Raleigh Durham, Detroit, Chicago, California Bay Area, New York, and Memphis. We have one international chapter in Johannesburg, South Africa. This year we are launching 6 new chapters. Our goal is to reach 1 million girls by 2040. Join the BGC movement at facebook.com/blackgirlscode.org and on twitter [@BlackGirlsCODE](https://twitter.com/BlackGirlsCODE)
