

March 7 Black Girls CODE is Coming to Miami!

- Who:** Families, youth, community members, potential volunteers
Where: Venture Hive, 1010 NE 2nd Ave, Miami, FL 33132
When: Monday, March 7, 2016 at 6pm
Why: Change the Face of Technology through STEM Education for Girls of Color in Miami
Cost: Free!
Deadline: Register by March 5 at <http://bit.ly/1o0jfJI>

Black Girls CODE will be hosting a Meet & Greet Kickoff to launch a new chapter in the greater Miami area. On March 7, the kickoff event will be held at Venture Hive and is sponsored by AT&T. It will be attended by industry partners, families, youth, and community members. Light refreshments will be served.

During this time information will be shared about the model and mission of Black Girls CODE. There will be an opportunity to register students and sign up for volunteer opportunities at upcoming workshops.

The following questions will be answered at the March 7 Meet & Greet Kickoff:

- What is Black Girls CODE's mission?
- When and where are workshops held? What do the workshops entail?
- How do girls and volunteers get involved?
- How does Black Girls CODE partner with schools?

Our first event in Miami will be a workshop, Build a Webpage in a Day, on March 26 9am-4pm for girls ages 7 - 17. The young women who participate will be building valuable skills in ideation, computation science, teamwork, and public speaking. All Black Girls CODE events are open to girls of all experience levels who are interested in computer science, STEM, mobile apps, design and gaming. Each student ticket for the Build a Webpage in a Day workshop will be \$35 and includes snacks, lunch and goodie bags. Limited scholarships are available for participants with financial needs.

Please visit <http://www.blackgirlscode.com/programsevents.html> for more information on all of our programs. *Please email raven@blackgirlscode.org with any questions.*

About Black Girls CODE

Since 2011, Black Girls CODE has been a transformative global movement fueled by the power of individual, but connected and engaged chapters, dedicated to providing girls of color with the technical skills and inspiration to become technology leaders of tomorrow. Black Girls CODE is committed to changing the face of technology. In 2012 - its first full year of programming - BGC engaged, educated and empowered 800 girls in 16 cities across the globe.

We have now reached over 4000 girls and built a network of over 2000 volunteers all over the country and world. We have 6 chapters in the United States - Atlanta, Washington DC, Raleigh Durham, Detroit, Chicago, California Bay Area, New York, and Memphis. We have one international chapter in Johannesburg, South Africa. This year we are launching 6 new chapters. Our goal is to reach 1 million girls by 2040. Join the BGC movement at facebook.com/blackgirlscodorg and on twitter [@BlackGirlsCODE](https://twitter.com/BlackGirlsCODE)
