What is RET?

The Research Experience for Teachers (RET) site at Florida International University (FIU) supports the active involvement of high school teachers and community college faculty in cyber-technologies research in order to bring knowledge of technological innovations in the field into their classroom.

Why RET at FIU?

- Receive **\$6,300** for doing some cutting-edge research!
- Become Active Learners as Members of a Research Community
- Build long-term collaborative partnerships with the world-renowned university research community
- Translate your research experiences and new knowledge into classroom activities.
- Form collegial partnerships with faculty and peers.
- Spark an interest in continuing relevant research or attend graduate school.
- And of course, receive a stipend of **\$6,300** and MDCPS Professional Development credits.

Nature of Activities for Teachers

- Conduct state of the art research
- Attend Workshops and Seminars
- Receive Faculty Mentoring
- Develop Classroom Activities (Required academic year follow-up sessions: four (4) Saturday sessions throughout the academic year.)
- For individual projects please contact faculty mentors listed at http://it2.fiu.edu/IT2_RET_Projects.php

How to Apply

- Application Instructions are accessible: <https://goo.gl/FO2pZZ>
- Application deadline: April 15, 2016

Schedule

- June 27 – August 5 2016
